WASHINGTON

Manufacturing Assembler State Competition

Come join a day-long event full of fun competition and activities at The Boeing Company's Everett factory. There will be a hands-on project, resume review with mock interviews. All conducted by Boeing personnel.

The hands-on project is based off of Knowledge, Skills, and Abilities (KSA) found in the Core Plus curriculum, units 1-10. These KSA are also in the SkillsInc CTE project #3. The other portion of the competition is resume review and a mock interview.

This competition has a limited capacity of 3 participants per school. Please limit the participants to those who can reasonably finish the hands on project within 3 hours.

*Hotel accommodations information is available in registration packet
